

The naturally silent thermodynamic water heater.

Thanks to a careful design and the use of a natural refrigerant, the new thermodynamic water heater **Remeha Azzora Ace** combines performances and daily comfort.

With a **COP of 3.3*** and its sheathed system, it will guarantee an economical and **quiet operation** in accordance with future regulations.

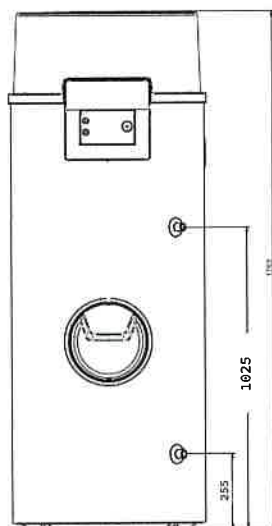

With its height controlled, even in 250 L, it can be installed everywhere, perfectly adapted in the new one, it will also replace easily an electric water heater without special work.

Guarantee of quality, its **French manufacture** and all components controlled throughout the production, will satisfy the most demanding.
